

**2026 International In-Service Training
Sawgrass Marriott – Ponte Vedra Florida
June 7 – 12, 2026**

IABTI IIST Training:

The IABTI IIST offers hands-on training, professional development, and networking opportunities for bomb technicians, explosives investigators, and post-blast investigators. The IABTI IIST also includes workshops, presentations, and interactions with international experts.

IABTI IIST Benefits:

The IABTI IIST provides attendees with a new perspective on their jobs, as well as access to career pathways, research, and professional development. Attendees can also learn about the challenges and successes of their colleagues.

Case Studies:

Technicians and Investigators are encouraged to submit and present a case study on a recently adjudicated case or to highlight a recent case that will bring new insights to the attendees and expand their investigative techniques.

- Erie Collar Bomb
- Webb Bait Farm Explosion
- Alfred P. Murrah Federal Building
- Downing of Flight MH17

Focus Areas and Topics:

- 3D Printing
- ATF Research Study and Laser Initiation of IEDs
- Grant Funding
- International Bombing Trends and Updates
- Drone Boat Research
- Circuit Building and AI
- UXO Response and Ownership
- Investigative Techniques
- HME
- K9 odors for techs
- Xray Techniques

Technology Partners:

There will be two evening technology displays in the Grand Ballroom and an outdoor hands-on training day on Wednesday.
